2. The following is an examiner's statement of reasons for allowance (See MPEP 1302.14):

The primary reasons for allowance of claims 1, 5, 8, and 9 in the instant application is the combination with the inclusion in these claims that there are the limitation of "*...wherein the data timing switch unit includes a timing register to which one of the first data output timing and the second data output timing is set, a first latch that latches an output data enable signal based on an inverted signal of the clock signal, and a second latch that latches the data based on the inverted signal of the clock signal, ...*". Kawai et al. and prior art record fail to teach or suggest the above recited combination.

In light of the reason set forth, claims 1, 5, 8, and 9 are allowable. All claims that are depending from claims 1, 5, 8, and 9 directly or indirectly are also allowable.
